The time period for reply, if any, is set in the attached communication.

Restriction

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-14, drawn to a composition and its clip.

Group II, claims 15-18, drawn to an automotive trim part.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is directed to a clip that is not part of the automotive trim part of Group III. This is lack unity *a priori* as there is no subject matter common to the independent claims. See MPEP 1850.

Further, the inventions listed as Groups I and II also do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

an assessment of the prior art with respect to the independent claims provides no unity of invention since the "special technical feature", i.e., "a clip housing mounting structure" claim 15, line 2-3, i.e., the clip housing, and the "clip housing comprising an inclined mounting portion" claim 15, line 4, common in each of the independent claims is

known from Berdan et al., 5,353,571. Applicant should note that the lack of unity is based on *a posteriori* and the special technical feature, common to the two inventions, do not define a contribution over the prior. See MPEP 1850.

A telephone call was made to Mr. Bruce E. Peacock on September 14, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
